

# SOCKS & ACCESSORIES

ski • hiking • running • trail • safety • firefighters  
labor • hunting • relaxation • leisure

2021

The Group **TALUX®** (Brand **ESTEX®** dedicated to the Working world and brand **RYWAN®** dedicated to the Sport world) has recently signed a contract with the company **DuPont™**, owner of the brand **KEVLAR®**, making it the first licensed European for socks.

- The fiber **KEVLAR®** is used at the wearing points of socks, the heel and toes, to improve the resistance to abrasion and therefore increasing their lifespan.
- Five products, including one for women, are already available in stock and other models are currently in development.

## HIGH RESISTANCE FIBER

Very good ripping resistance  
Superior traction resistance than steel\*

Since 1985 RYWAN, as precursor, takes the sock out of its banality to make it a product in its own right. The conception of the models, the research of new knitting methods, new materials, of an environmental approach as well as the improvement of our products constitutes the heart of our job, centering our organization around it.

Today RYWAN is offering you a complete collection of technical socks and accessories for the well-being of your feet.

All the concepts of our models are done in France with the help of athletes and professionals to then be fabricated in the Italian factories.

- Design creation
- Samples development
- Constant research for new materials
  - Keeping up with new technological developments
- Tests in real conditions

## The guarantee of institutions

### SKI Partnerships

French Ski Teams / French Skiing Federation

#### ALL SUPPORTERS OF OUR CHAMPIONS

RYWAN, official supplier of the French Ski Teams and the French Ski Federation

### OUTDOOR & SKI Partnerships

# Hiking - Walking *Warm climates*

When temperatures exceed 23°, the foot wicks away more than 25 cl of sweat over a day of walking. In parallel, the repetitive motion of walking causes irritation and blisters. The sock has an essential role. It has to eliminate sweat and heat, protect from friction, and permanently ensure the best climatic comfort.

Réf. 1 813

## COMPOSTELLE CLIMASOCKS®

## MARATHON DES SABLES

- Ultra-thin – Ultra light – Hyper ventilated

Ankle socks, 35/37 - 38/40 - 41/43 - 44/46

025

### Features

- + 4 ventilation areas for a better foot temperature regulation
- + « Second skin » inner sock in Coolmax®
- + Outer sock in Dryarn® polypropylene microfiber, hydrophobic and resistant
- + Double variable mesh on the instep for a better support

### Features

- + Anti-compressive double ribbed cuff
- + Breathable sole in thin HD® polyamide terry loop from the top of the toes to the Achilles tendon
- + Large Cordura® reinforcements on the heel, the toes, and support zones
- + Large variable mesh for support on the instep
- + Triple stabilization strips for perimetric support

RYWAN

### Features

- + Rigid support of the arch of the foot
- + 3D "Strapping" effect
- + Self-adaptive knitting
- + Climasocks® hyperventilation by micro-perforations

### Features

- + Anti-compressive stich knit double ribbed cuff
- + Complex knitting, ultra-light, very resistant, and thin for a reduced volume in the shoe
- + Thin terry loop reinforcement in the heel and toes
- + Large holding variable mesh around the ankle

# Compression

The compression market is no longer a niche, it's exploding. For each sports activity, Rywan takes into account the bio-mechanical and thermal needs of users (suitable % of graduated compression and selection of the sole's fiber according to the activity).
