2022-2023

Since 1985 RYWAN, as precursor, takes the sock out of its banality to make it a product in its own right. The conception of the models, the research of new knitting methods, new materials, of an environmental approach as well as the improvement of our products constitutes the heart of our job, centering our organization around it. Today RYWAN is offering you a complete collection of technical socks and accessories for the well-being of your feet. All the concepts of our models are done in France with the help of athletes and professionals to then be fabricated in the Italian factories.

- Design creation • Samples development
- Constant research for new materials
- Keeping up with new technological developments
- Tests in real conditions

# Hiking - Walk *Warm Climates*

When temperatures exceed 23°, the foot wicks away more than 25 cl of sweat over a day of walking. In parallel, the repetitive motion of walking causes irritation and blisters. The sock has an essential role. It has to eliminate sweat and heat, protect from friction, and permanently ensure the best climatic comfort.
