

SHRED.

SNOW | 2023 - 2024 | EYEWEAR, HELMETS, AND PROTECTION

"I needed better products so I could take my performance to a higher level. In 2006, we launched SHRED. and created our own superior goggle and protection technologies. Today, we make the best eyewear and protective gear for skiers, snowboarders, and mountain bikers. PERIOD."

SHRED. RECYCLED GOGGLE STRAP LINE.

In 2020 we were the first to eliminate all plastic components from the packaging of all of our goggles.

In 2021 we were the first to introduce polyester from recycled plastic bottles to make goggles straps.

We are now expanding the line by adding new models and new colors, including the first recycled strap goggles to ever compete in the Olympics.

84

% of SHRED. recycled goggle line's straps are made of recycled plastic bottles.

SIMPLIFY+

If you're looking for the best performing ski and snowboard goggle that defeats flat light while providing the widest field of vision in the game and a sleek, almost frameless cylindrical lens style, then SHRED. Simplify is your best choice. It features CONTRAST BOOSTING LENS™ 2.0 (CBL 2.0)* / CONTRAST BOOSTING LENS™ (CBL) and NODISTORTION™ technology to enhance contrast and image definition, SHRED.wide™ to maximize field of view, and a 1-2-3 SHRED REPLACEMENT SYSTEM™ that in just 3 easy steps lets you swap between the included "sun and clouds" and "snow and overcast" CBL lenses. Unleash your potential and take control of the mountains for endless fun. SHRED. Simplify is compatible with prescription glasses (OTG).

*Available in select models.

FEATURES:

SHRED. CONTRAST BOOSTING LENS™ | Enhances image contrast and definition for all weather and light conditions || **SHRED. CONTRAST BOOSTING LENS™ 2.0*** Enhances image contrast and definition even further for all weather and light conditions by killing flat light and glare.

*Available in select models.

SHRED.wide™ | Goggles designed and engineered to maximize your field of view.

SHRED. NODISTORTION™ | Pressure regulation valve technology to provide crystal clear vision during altitude change.

1-2-3 SHRED. REPLACEMENT SYSTEM™ | 3-step quick and easy lens replacement.

SHRED. OTG | Designed to provide compatibility and comfort with prescription glasses.

SHRED. NOCLOG™ | Hydrophobic treatment on vents to reduce clogging from snow or water and help prevent fogging.

NASTIFY

If you're looking for a simple yet stylish smaller-fitting ski and snowboard goggle that provides a wide field of vision and unrivaled fit and comfort, then choose the SHRED. Nastify. It features SHRED.wide™ to maximize your field of view, a Grip on Strap silicone strip to hold them securely in place, and Super Anti Fog treatment. For exceptional comfort, it has an especially flexible frame. The Nastify gives you the confidence and control you need to boost your fun on the mountain.

FEATURES:

SHRED.wide™ | Goggles designed and engineered to maximize your field of view.

SUPER ANTI-FOG | Double lenses combined with a unique heavy duty hydrophilic treatment on the inner lens.

GRIP ON STRAP | A special design on the inside of the strap to ensure the goggles stay in place and don't slip off.

TECH SPECS:

LENS | Cylindrical double lens | 100% UVA-UVB-UVC protection | Super Anti-Fog

FRAME | Width: 165 mm | Height: 100 mm

STRAP | Width: 40 mm | Triple silicone line backing | 2-point slide adjustment system

WEIGHT | 130 g

SUGGESTED FIT | XS to M helmet size

IN THE BOX:

1 pair of SHRED. Nastify goggles | 1 SHRED. goggle soft case

SHRED. goggles packaging is 100% plastic free

HELMETS TECHNOLOGY

SMART IMPACT PROTECTION

Powered by SHRED.'s Rotational Energy System™ and Slytech™ Shock Absorption.

To boost your confidence and fun, SHRED.'s Smart Impact Protection System™ effectively combats both rotational and linear forces. Simply put, this reduces harmful forces transmitted to your brain. SHRED.'s Rotational Energy System™ offers the lightest and thinnest solution for addressing rotational forces while Slytech™ Shock Absorption maximizes the helmet's ability to dissipate linear impact energy. Unleash your potential with SHRED.'s Smart Impact Protection System.™

Smart Impact Protection Made Even Smarter.

NOTION NOSHOCK

If you're a skier or snowboarder searching for a premium helmet that boosts your confidence by offering unrivaled technology to absorb both rotational and linear energy—while also striking the perfect balance between being lightweight and durable—look no further than the Notion NoShock. Equipped with SHRED's SMART IMPACT PROTECTION SYSTEM™, this new flagship helmet pairs SHRED's ROTATIONAL ENERGY SYSTEM™ (RES)—which is the lightest and thinnest solution for addressing rotational forces—with the helmet's integrated honeycomb-cone-structured SLYTECH™ SHOCK ABSORPTION to create an unparalleled synergy for combating linear and multi-directional forces. Its hybrid construction combines the durability of a hard shell upper with the weight savings of an in-molded lower shell and sidewalls. A unique 3-position switch allows you to control the top, back, and side vents simultaneously. A passive RECCO reflector further enhances your safety while the helmet's Fidlock magnetic closure offers security and convenience. The Notion NoShock boosts your confidence, allowing you to charge harder and amplify your fun.

FEATURES:

SHRED. ROTATIONAL ENERGY SYSTEM™ | Patent-pending technology that manages the effects of rotational accelerations to the head on impact by allowing a relative movement between the helmet and the head through the use of ultra-thin, multi-directional absorption units made with an elastic layer.

SLYTECH™ SHOCK ABSORPTION | SHRED's patented solution to increase linear impact energy dissipation. It integrates a slow memory honeycomb cone structure into the helmet's EPS impact absorption element.

XT2® | Anti-microbial technology to provide permanent odor protection.

VENTILATION | 3-position switch controls top, back and side vents simultaneously.

RECCO® | Integrated reflector with passive technology that enables rescue professionals to search for you in the event of an avalanche or if lost outdoors.

FIDLOCK® | Magnetic closure to enhance convenience, security, and efficiency.

HEXAFLOW™ | Three-dimensional EPS with channels to enhance linear impact absorption and maximize ventilation.

If you're looking to venture into the backcountry or lap the resort with a superlight in-mold ski and snowboard helmet that offers a superior fit, exceptional comfort, and unrivaled technology that provides both rotational and linear energy absorption, the SHRED Slam-Cap NoShock 2.0 is the clear contender. Its SMART IMPACT PROTECTION SYSTEM™ pairs SHRED's ROTATIONAL ENERGY SYSTEM™ (RES) – which is the lightest and thinnest solution for addressing rotational forces – with the helmet's integrated honeycomb-cone-structured SLYTECH™ SHOCK ABSORPTION to create an unparalleled synergy for combating linear and multi-directional forces. Reflecting SHRED's commitment to continual refinement, the Slam-Cap NoShock 2.0 features an improved fit for even greater comfort. Thanks to the Slam-Cap NoShock 2.0, you can charge with confidence and boost your performance, style, and fun.

FEATURES:

SHRED. ROTATIONAL ENERGY SYSTEM™ | Patented technology that manages the effects of rotational accelerations to the head on impact. It allows a relative movement between the helmet and the head through the use of ultra-thin and ultra-light elastic absorption units.

SLYTECH™ SHOCK ABSORPTION | SHRED's patented solution to increase linear impact energy dissipation. It integrates a slow memory honeycomb cone structure into the helmet's EPS impact absorption element.

XT2® | Anti-microbial technology to provide permanent odor protection.

TOTALITY NOSHOCK

Are you searching for a lightweight yet extremely durable hard shell ski and snowboard helmet that offers a superior fit and comfort and features unrivaled technology to address both rotational and linear energy absorption? Then the Totality NoShock is the perfect choice. Its SMART IMPACT PROTECTION SYSTEM™ pairs SHRED's ROTATIONAL ENERGY SYSTEM™ (RES)—which is the lightest and thinnest solution for addressing rotational forces—with the helmet's integrated honeycomb-cone-structured SLYTECH™ SHOCK ABSORPTION to create an unparalleled synergy for combating linear and multi-directional forces. The Totality NoShock gives you the confidence you need to reach the next level, feel like a pro, and have fun.

FEATURES:

SHRED. ROTATIONAL ENERGY SYSTEM™ | Patent-pending technology that manages the effects of rotational accelerations to the head on impact by allowing a relative movement between the helmet and the head through the use of ultra-thin, multi-directional absorptive units made with an elastic layer.

SLYTECH™ SHOCK ABSORPTION | SHRED's patented solution to increase linear impact energy dissipation. It integrates a slow memory honeycomb cone structure into the helmet's EPS impact absorption element.

XT2® | Anti-microbial technology to provide permanent odor protection.

VENTILATION | Strategic vent system to channel warm air from the goggles and the front of the helmet to its back, preventing goggles from fogging and the head from sweating.

BASHER ULTIMATE

Are you a ski racer searching for the best-performing FIS-certified helmet that not only has the lowest profile, fits great, and looks amazing, but is also lightweight and offers unrivaled technology to address both rotational and linear energy absorption? Then the SHRED. Basher Ultimate is the perfect choice. Its **ROTATIONAL ENERGY SYSTEM™ (RES)**—which is the lightest and thinnest solution for addressing rotational forces—is paired with **Casidion™**—a nanotechnology-based impact liner that's thinner and lighter than those used in other racing helmets—to create an unparalleled synergy for combating linear and multi-directional forces. Charge with confidence and boost your performance, style, and fun.

FEATURES:

SHRED. ROTATIONAL ENERGY SYSTEM™ | Patent-pending technology that manages the effects of rotational accelerations to the head on impact by allowing a relative movement between the helmet and the head through the use of ultra-thin, multi-directional absorption units made with an elastic layer.

CASIDION™ | Revolutionary nanotech foam that goes beyond the performance of traditional materials. This absorption element offers protection even in the case of repeated impacts and provides an extraordinarily high impact absorption efficiency, allowing it to be thinner and lighter than other commonly used components.

XT2® | Anti-microbial technology to provide permanent odor protection.

FIS RH 2013 | Certified according to FIS RH 2013 ski racing helmet safety standards.

CUSTOM FIT KIT | An additional set of thicker pads and ear pieces to fine tune the helmet's fit.

SL CHIN GUARD | Fully compatible with SHRED. Hard-Ear Chin Guards.

PROTECTION TECHNOLOGY

ULTIMATE PROTECTION PERFORMANCE

Powered by SHRED.'s
Slytech™ Shock Absorption.

Especially thin, light, and flexible, Slytech™ Shock Absorption provides protection you can forget you're wearing—until you truly need it. Developed by SHRED. Co-founder and materials engineer Carlo Salmini while at MIT, this proprietary shock-absorbing material intelligently and progressively adapts to different forces and impact speeds for thorough protection—even in low energy crashes. By staying flexible when you ride but hardening when you crash, it offers enduring comfort and unparalleled protection.

Drop in with confidence with SHRED.'s Slytech Shock Absorption.

PROTECTION TECHNOLOGY

SHRED. | Slytech™ Shock Absorption

- ✓ Developed by SHRED.'s Co-founder and MIT graduate Carlo Salmini
- ✓ Protection from linear impacts
- ✓ Unmatched flexibility and comfort
- ✓ Unparalleled shock absorption efficiency

You can forget you are wearing it...until you truly need it.
P.S. If you can forget you're wearing it, there's no point not to use it.

NOSHOCK BACK PROTECTOR

If you continually push your limits and are looking for the highest level of protection and enhanced support, SHRED. NoShock Back Protector is just what you need. Their honeycomb-cone-structured SLYTECH™ SHOCK ABSORPTION provides the highest impact energy absorption performance (Level 2) and offers uncompromised comfort, flexibility, and ventilation. A 3-point belt also supports the lower back. Thanks to Shred's NoShock Back Protector, you can feel strong, confident, stoked, and in control.

FEATURES

SLYTECH™ SHOCK ABSORPTION | Our proprietary shock-absorbing material intelligently and progressively adapts to different forces and impact speeds for thorough protection—even in low energy crashes. Simply put, it stays flexible when you ride but hardens to protect you when you crash.

SLYTECH™ NOSHOCK | Patent-pending honeycomb cone structure that further increases the performance, safety, and comfort of our proprietary Slytech™ Shock Absorption by reducing weight and promoting ventilation.

FLEXI ELBOW AND KNEE PADS

If you're a skier or snowboarder searching for more protection, the SHRED. Flexi Elbow and Knee Pads Lite are the perfect addition to your kit thanks to their unrivaled comfort, mobility, protection, and pedalability. Their SLYTECH™ SHOCK ABSORPTION protective element molds to your skin to match every move you make and is exceptionally thin, flexible, light, and breathable. Anatomically-shaped Spandex stretch sleeves securely hold the pads in place and Armortex® fabric over the protective element provides abrasion and puncture resistance. Get the confidence you need to feel like a pro and have fun.

FEATURES

SLYTECH™ SHOCK ABSORPTION | Our proprietary shock-absorbing material intelligently and progressively adapts to different forces and impact speeds for thorough protection—even in low energy crashes. Simply put, it stays flexible when you ride but hardens to protect you when you crash.

SLYTECH™ Flexi | Slytech™ Shock Absorption molded with a hexagon structure is especially thin and light while also offering unrivaled flexibility and certified impact energy absorption.

ARMORTEX® | This tough, elastic fabric on the front panels of the pads enhances durability, offering protection from abrasion and punctures while also stretching to provide comfort and a refined fit.

SKI RACE PROTECTION

SNOW | 2023-2024

SHRED.

CARBON SHIN GUARDS

If you're a ski racer looking for unrivaled performance when you clear slalom gates, SHRED. Carbon Shin Guards are the perfect choice. Their SLYTECH™ SHIELD CARBON advanced composite material provides exceptional protection and features ADVANCED GATE GLIDE technology to minimize friction. And to stay in place, they sport SHRED. GRIP PADS. With their unparalleled shin protection and gate clearing speed, the SHRED. Carbon Shin Guards provide the confidence you need to focus on your skiing and feel like a pro.

FEATURES:

SLYTECH™ SHIELD CARBON | A high performance material blend that combines carbon fiber technology and our SLYTECH™ SHIELD CARBON material to create shells that are extraordinarily durable yet lightweight and that provide the best performance at all temperatures.

ADVANCED GATE GLIDE™ | NOFRICTION PTFE™ technology blends PTFE into the SLYTECH™ SHIELD CARBON composite material. This serves as a lubricant, reducing friction and drag between the guard and gates to boost speed.

SKI RACE PROTECTIVE GLOVES

If you're a ski racer looking for a pair of gloves or mittens that protect the back of your hands and your thumbs while providing unparalleled abrasion resistance and durability, the SHRED. Ski Race Protective Gloves or the SHRED. Ski Race Protective Mittens are the perfect choice. Their SLYTECH™ Foam offers unrivaled impact energy absorption around your knuckles and thumb while PRIMALOFT® insulation provides exceptional warmth. The gloves also feature SUPERFABRIC® armor plates on the back of the hand, overlay panels for compatibility with arm guards, a tacky grip layer on the palm, and a nose wipe for additional comfort. Ski with confidence and unleash your potential.

FEATURES:

SLYTECH™ SHOCK ABSORPTION | Our proprietary foam intelligently and progressively adapts to different forces and impact speeds for thorough protection—even in low energy crashes. Simply put, it stays flexible when you ride but hardens to protect you when you crash.

PRIMALOFT® insulation | Ultra-fine microfiber insulation that is warm, soft, and lightweight.

THUMB PROTECTION | Strategically placed Slytech™ Shock Absorption pads to protect against skier's thumb

SKI RACE PROTECTIVE GLOVES MINI

Are you looking for a pair of ski race gloves or mittens for your little racer that suit small hands and can protect them while providing abrasion resistance and durability? Then the SHRED. Ski Race Protective Gloves or Mittens Mini are the perfect choice. Their SLYTECH™ Foam offers unrivaled impact energy absorption around your knuckles and thumb while PRIMALOFT® insulation provides exceptional warmth. The gloves and mittens also feature overlay panels for compatibility with arm guards and a nose wipe for additional comfort. Ski with confidence and unleash your potential.

FEATURES:

SLYTECH™ SHOCK ABSORPTION | Our proprietary foam intelligently and progressively adapts to different forces and impact speeds for thorough protection—even in low energy crashes. Simply put, it stays flexible when you ride but hardens to protect you when you crash.

PRIMALOFT® insulation | Ultra-fine microfiber insulation that is warm, soft, and lightweight.

THUMB PROTECTION | Strategically placed Slytech™ Shock Absorption pads to protect against skier's thumb

CORDURA® | Tough and durable fabrics to provide extra abrasion resistance

GRIP CONTROL™ | Tacky leather to enhance grip on skis, board, and poles.

BELUSHKI

If you love the outdoors and need sunglasses to pursue your passion – with plenty of style – look no further than the SHRED. Belushki. Armed with a timeless design, it features flatter lenses with a base six curve. Made of liquid-cast urethane, these lenses showcase SHRED's CONTRAST BOOSTING LENS™ (CBL) technology to enhance contrast, image definition, and the vividness of colors – no matter the terrain or conditions. The Belushki also features a featherlight NOWEIGHT™ frame and strategically-positioned rubber pads ensure it stays in place. The Belushki gives you the confidence, performance, and style you need to elevate your game and amplify your fun.

FEATURES:

SHRED. CONTRAST BOOSTING LENS™ | Enhances contrast and definition for all weather, surface, and light conditions.

SHRED. NOWEIGHT™ | Especially light, thin, and flexible, this frame design reduces the material used in interior areas subject to minimal stress and reinforces target areas for maximum durability. This creates tremendous strength without compromising the clean, streamlined appearance of the frame's exterior.

SHRED. POLARIZED | Polarizing filters of the highest quality enhance our lenses and reduce glare by blocking all angles of light that are scattered and reflected from surfaces such as water, snow, and ice.

SHRED. NOSLIP™ | Specially formulated rubber pads on the nose and temple tips to further enhance comfort and ensure the frames stay in place while you're in motion.

TECH SPECS:

LENS | Liquid-cast urethane lenses provide exceptional optical precision and impact protection | Base 6 lens provides a flatter look | 100% UVA-UVB-UVC protection | Lens width: 50.1 mm / 1.97 in | Lens height: 42.3 mm / 1.66 in

STOMP

If your life revolves around the outdoors and you need sunglasses that offer exceptional clarity and contrast, the SHRED. Stomp is just what you need—no matter the adventure. Its liquid-cast urethane lenses showcase SHRED's CONTRAST BOOSTING LENS™ (CBL) technology to enhance contrast, image definition, and the vividness of colors. With a base six curve, these lenses provide the featherlight NOWEIGHT™ frame with a flatter appearance. Strategically-positioned rubber pads also ensure the frames stay in place while you're in motion. By infusing a classic design with unrivaled performance, the Stomp boosts your confidence, style, and fun.

FEATURES:

SHRED. NOWEIGHT™ | Especially light, thin, and flexible, this frame design reduces the material used in interior areas subject to minimal stress and reinforces target areas for maximum durability. This creates tremendous strength without compromising the clean, streamlined appearance of the frame's exterior.

SHRED. CONTRAST BOOSTING LENS™ | Enhances image contrast and definition for all weather, surface, and light conditions.

SHRED. POLARIZED | Polarizing filters of the highest quality enhance our lenses and reduce glare by blocking all angles of light that are scattered and reflected from surfaces such as water, snow, and ice.

PROVOCATOR

If your life revolves around the outdoors and you need sunglasses that offer If the outdoors are your playground and you're searching for sunglasses that provide exceptional clarity and contrast in a design that wraps around your face for additional protection, look no further than the SHRED. Provocator. Its liquid-cast urethane lenses showcase CONTRAST BOOSTING LENS™ (CBL) technology to enhance contrast, image definition, and the vividness of colors. The Provocator features lenses with a base eight curve and a featherlight NOWEIGHT™ frame with a wraparound design for additional protection. Strategically-positioned rubber pads also ensure the frames stay in place. Boost your confidence, performance, and style with the SHRED. Provocator.

FEATURES:

SHRED. NOWEIGHT™ | Especially light, thin, and flexible, this frame design reduces the material used in interior areas subject to minimal stress and reinforces target areas for maximum durability. This creates tremendous strength without compromising the clean, streamlined appearance of the frame's exterior.

SHRED. PHOTOCROMIC | Photochromic dye technology allows our lenses to automatically adjust to changing light conditions, altering their tint to improve vision and performance. This allows you to transition from darkness to light and back instantly without compromising terrain definition. *Available in select models.

SHRED. CONTRAST BOOSTING LENS™ | Enhances image contrast and definition for all weather, surface, and light conditions.

SHRED. POLARIZED | Polarizing filters of the highest quality enhance our lenses and reduce glare by blocking all angles of light that are scattered and reflected from surfaces such as water, snow, and ice.
