Our company.

Our mission.

We're on a mission to transform lives with **thoughtfully designed, clean technology**. From concept to creation, every detail of our business is deliberate. As a **Benefit Corporation and B Corp**, we set strict standards for ourselves, ensuring that our work enhances both society and the environment. Our innovative products give people the **power of self-reliance** as well as **moments of wonder**—because we believe everyone deserves to be empowered and inspired regardless of where or how they live.

A young girl with dark hair, wearing a dark sweater, is smiling and washing her hands at a public water tap. The tap is set into a rough, aged brick wall. Water is flowing from the tap onto her hands. The scene is dimly lit, with a warm, yellowish light source visible in the background, possibly a window or a light fixture. The overall mood is one of joy and cleanliness.

Our impact.

Luci® lights have impacted millions of people in more than 90 countries – providing clean, reliable light to those living without access to consistent electricity.

3.7 million+
lives impacted in
emerging markets

2.4 million+
US tons of CO2
averted

700+
NGO and non-profit
partners worldwide

Stats as of Summer 2020

Our Give program.

We work with our non-profit partners to send our lights directly to people living without access to electricity.

In many places, as soon as the sun goes down, children can't study, entrepreneurs have to stop working, women are less safe walking outside, health clinics have to close... the list goes on. Kerosene lamps are the most common solution in these areas – but they are dangerous, toxic and expensive.

Lightweight, easy to carry, and shining for hours on a single charge, Luci is a clean, safe and affordable way to bring light to the world.

Our products.

Lightweight. Pack it up and take it with you.

Waterproof. Leave it out in the rain.

Durable. Can withstand up to 150 lbs of pressure. Yes, really!

Completely solar. Just add sun.

A man and a woman are smiling and looking towards the camera. They are positioned in front of a large, light-colored tent. The interior of the tent is illuminated with a warm, purple glow from a string of small lights. The man is wearing a white t-shirt, a dark cap, and glasses. The woman is wearing a light-colored, sleeveless top. The background is dark, suggesting it is nighttime. The overall mood is cheerful and relaxed.

Brand new.

Luci Color Solar String Lights.

Solar, colorful, and always ready to hang. **Luci.**

Luci Color Solar String Lights

Providing 6 colors of ambiance across an 18 ft cord, powered by the sun, and with mobile charging, these lights are perfect for illuminating your space.

home decor • patio • mood lighting • events • bath

A hand in a red sleeve is using a Lucii utility light to inspect an electrical panel. The light is a small, white, circular device with a yellow cord, which is plugged into a power outlet on the panel. The panel is made of metal and shows signs of rust. The background is a dark, textured wall.

Our utility light.

The little light that's ready for anything. **Luci.**

Pocket-sized light for
everyday tasks. **Luci.**

Luci Core

Lightweight, weatherproof, durable, and super bright,
Luci Core is everything you'd expect from a Luci light.

task light • reading • off-grid adventures

A photograph of two children, a young girl with dark skin and braided hair, and a young boy with light skin and short blonde hair, working together on a project. They are in a room with bookshelves in the background. The girl is wearing a dark grey t-shirt and the boy is wearing a light blue and yellow striped t-shirt. They are both looking down at a clear plastic container on a table. The girl is pointing at something inside the container. There are some colorful blocks and a clear glass on the table. A white box is visible on the left side of the frame. The text 'Education & STEM.' is overlaid on the left side of the image in white and yellow font. The text 'Educating future generations about the power of the sun.' is overlaid on the right side of the image in white font.

Education & STEM.

Educating future generations
about the power of the sun.

Build your own LED light.
Learn about solar energy.
Create unique color combinations.

12.7 x 14.2 cm (5 x 5.6 in)

All Luci lights have an operating temperature of 0-45C (32-122F). 12.7cm (5") diameter units are 10.8cm (4.25") high & 2.5cm (1") collapsed (4.5cm (1.8") for Pro) excluding Solar String Lights (5cm (2") fixed). 10.2cm (4") diameter units are 10.2cm (4") high & 3.2cm (1.25") collapsed.

Opportunity isn't lost in the dark.

By Angela Rizner

"Sometimes you think you're on your path, but you're wrong" explains ten-year old Shaun. "You are lost. But sometimes you have to discover you aren't going in the right direction to know where your path is."

Shaun is a "philosopher king" and one of the many bright children looking to improve their situation. Kids like Shaun embody the hope of a better future. Without education, however, they are at risk of becoming enveloped within a vortex of hopelessness.

Shaun and others fully recognize the difficulty of their lives; most find that their fate is not necessarily mapped out by the night sky, but by their own determination and hard work. "I love the stars. Sometimes I look at the sky at night and pretend I am jumping from planet to planet, and I feel free..."

In a place that often feels suffocating, education provides much needed expansion. It instills a daily recognition of future possibility. Education shifts a closed mind to an open mind. Education leads to the realization that there are many ways to exist. Education is empowerment.

To succeed, you need light to do your homework; but in Kibera, people are under financial and energy poverty. If you can't afford food, you are likely unable to afford light.

Imagine trying to do your homework at night, and there is no light. Opportunity becomes lost in the darkness.

Shaun loves school. He knows that his future relies on studying hard. He dreams that, "one day I will be a pilot and buy a nice home for mommy." He is determined to free himself of his current situation and reach his goals.

"One night I had a dream that we were on a plane, and the plane began to crash, and I rushed into the cockpit. I grabbed the pilot, threw him to the other seat, and took over... That dream means I control my own destiny."

Sometimes all we need is a little help. We need someone to believe in us, and we need a few practical tools to get us to the next step. **A little Luci light goes a long way.** When Shaun turned on the light, he knew instantly that his future was brighter. He knew that his destiny was, in fact, his own.
